

PRASANNA JAGANADHAM

Software Engineer • Data Analyst • BI Developer

Dijon, France | +33 6 83 21 10 50 | jaganadhamprasanna@gmail.com | [LinkedIn](#) | [GitHub](#)
Indian national • Working visa (APS permit) • Available June 2026

PROFILE

Software Engineer with **1.5 years** at Infosys building banking software on the Finacle core platform for European banking clients — using SQL, UNIX, and Excel to deliver production reports and reconciliations. Currently completing my **MSc Data Science** at Burgundy School of Business (Grande École), Dijon. Seeking **Data Analyst** or **BI Developer** roles in France and the EU. Trilingual: English (C1), French (B1, →B2), Telugu (native).

PROFESSIONAL EXPERIENCE

Software Engineer Feb 2022 – Jun 2023

Infosys Ltd. — Hyderabad, India • Full-time (1 year 5 months)

- Worked on the **Finacle core banking platform** for major European banking clients across Payments, CRM, Treasury, and Wealth Management modules.
- Built and maintained **SQL queries and UNIX shell scripts** to extract banking data from Finacle backend schemas and feed downstream reporting workflows.
- Designed structured **Excel-based reports** for client banking teams — transaction summaries, branch-level activity, reconciliations — used in their daily operations.
- Optimised long-running SQL queries through indexing and join restructuring, **turning multi-hour reports into ones completing in minutes** and saving hours per reporting cycle.
- Collaborated with onshore client teams across European time zones; documented data flows and handed over production-ready scripts.

Data Analyst Intern May 2024 – Aug 2024

YBI Foundation — Remote • India (4 months)

- Built a sales forecasting model in Python (Scikit-learn) improving **MAPE by 15%** over the naïve baseline on a 12-month hold-out.
- Cleaned and unified **200,000+ records** from 3 sources (Excel, SQL exports, CSV logs) into a single analysis-ready dataset using reusable Python modules.
- Designed Power BI KPI dashboards adopted into weekly executive reviews — first hands-on Power BI work, since deepened through MSc projects.

EDUCATION

MSc Data Science & Organisational Behaviour 2024 – 2025

Burgundy School of Business (Grande École) — Dijon, France

Master in Management (MIM) 2023 – 2024

Burgundy School of Business (Grande École) — Dijon, France

SELECTED PROJECTS

Amazon Price Tracker & Email Alerter (2026)

End-to-end Python web scraping project tracking amazon.fr daily, logging to CSV, and emailing when price drops below target. Solved 6 real bugs (anti-bot headers, broken selectors, French locale formatting, Gmail SMTP authentication).

Python • BeautifulSoup4 • requests • smtplib • pandas • CSV • Jupyter

Spotify Music Analytics Dashboard (MSc)

Interactive Power BI dashboard with star-schema data modelling and custom DAX measures — slicers for genre, era, artist; drill-through navigation; KPI cards and time-series visuals.

Power BI • DAX • Power Query • Star schema modelling

COVID-19 ICU & Med/Surg Patient Load Analysis (MSc)

Dockerised PostgreSQL database monitoring hospital capacity utilisation; hypothesis testing (two-sample t-tests with multiple-comparison correction) identified facilities with statistically significant persistent over-capacity.

PostgreSQL • Docker • Python (scipy.stats) • SQL aggregations

TECHNICAL SKILLS

Data & BI:	SQL (windows, CTEs, tuning), Excel (advanced, Power Query), Power BI + DAX, Tableau
Programming:	Python, pandas, BeautifulSoup, scikit-learn, UNIX shell scripting, Jupyter
Statistics:	EDA, Regression, Hypothesis testing, Time-series forecasting
Data Engineering:	SQL stored procedures & indexing, Alteryx (3× certified), Web scraping, Finacle core banking
Tools & Cloud:	Git / GitHub, Docker, Microsoft Azure Fundamentals

CERTIFICATIONS & LANGUAGES

Certifications: Alteryx Data Manipulation • Alteryx Data Preparation • Alteryx Data Transformation • Bloomberg Market Concepts (BMC)

Languages: English (C1, fluent) • French (B1, working toward B2) • Telugu (native)
